Apr 2026

Follow-up Window

Recommended tests to re-check in your follow-up cycle.

Lipid Profile, Liver Function Tests (LFT), Diabetes Panel, CRP

Triggered Rule Insights

Cardiac Risk Watch

Lipid profile trend suggests cardiovascular risk needs follow-up.

- Lifestyle and physician review
- Retest lipid profile in 3-6 months

Summary by Type

Cardiac

Unfavourable	2
High	2
Low	0
Normal	3
Priority	1

Total Cholesterol • LDL Cholesterol • Triglycerides • HDL Cholesterol

Liver

Cardiac (Lipid)

Total Cholesterol

High

Total cholesterol in blood; useful for overall lipid risk evaluation.

LATEST **205 mg/dL** | TREND | LAST UPDATED **20 Dec 2025**

205

Low 1 — Lower is better — High 200

Reference: *Desirable Level: Less than 200
Borderline : 200 - 240
Undesirable : Above 240

30 Nov 2024 **209** | 02 Jul 2023 **194** | 12 Nov 2022 **185**

LDL Cholesterol

High

Low-density lipoprotein; higher levels can increase cardiovascular risk.

LATEST **129.6 mg/dL** | TREND | LAST UPDATED **20 Dec 2025**

129.6

Low 0 — Lower is better — High 129

Reference: * Optimal : Less than 100
Near Optimal : 100 - 129
Borderline High : 130 - 159
High : 160 - 189
Very High : Above 190

30 Nov 2024 **139.6** | 02 Jul 2023 **82.6** | 12 Nov 2022 **122.2**

Triglycerides

Normal

Blood fat linked with metabolic and cardiovascular risk when elevated.

LATEST
132 mg/dL

TREND

LAST UPDATED
20 Dec 2025

132

Low 0 | Lower is better | High 150

Reference: *Desirable Level : < 150
Borderline High : 150 - 199
High : 200 - 499
Very High : > 500

30 Nov 2024 **87** | 02 Jul 2023 **377** | 12 Nov 2022 **49**

HDL Cholesterol

Normal

High-density lipoprotein; generally protective for heart health.

LATEST
49 mg/dL

TREND

LAST UPDATED
20 Dec 2025

49

Low 40 | Higher is better | High 120

Reference: * Desirable Level : More than 60
Optimal : 40 - 59
Undesirable : Below 40

30 Nov 2024 **52** | 02 Jul 2023 **36** | 12 Nov 2022 **53**

Homocysteine

Normal

Amino acid marker linked with vascular and nutritional risk profiling.

LATEST
10.98 µmol/L

LAST UPDATED
26 Feb 2019

10.98

Low 5.46 | Target range | High 16.2

Reference: Male: 5.46 - 16.20

Diabetes

Fasting Glucose

Normal

Fasting blood sugar level after an overnight fast.

LATEST
97 mg/dL

TREND

LAST UPDATED
20 Dec 2025

97

Low 70 | Lower is better | High 100

Reference: 70 - 100
Impaired Fasting: 100 - 125

30 Nov 2024 **103** | 02 Jul 2023 **105** | 12 Nov 2022 **90**

Glycosylated Haemoglobin

Normal

Average blood sugar control over the last ~3 months.

LATEST
5.5 %

TREND

LAST UPDATED
07 Nov 2025

5.5

Low 4 | Lower is better | High 5.7

Reference: Up to 5.6 % : Normal
5.7 - 6.4 % : Increased risk for Diabetes
> 6.5 % : Diabetic Range
> 7.0 % : Indicative of poor glycaemic control
> 9.0 % : Suggestive of uncontrolled diabetes

30 Nov 2024 **5** | 02 Jul 2023 **5.6** | 30 Nov 2022 **5.4**

Kidney

Creatinine

Normal

Kidney filtration marker; helps assess renal function.

LATEST
1.01 mg/dL

TREND

LAST UPDATED
20 Dec 2025

1.01

Low 0.8 | Lower is better | High 1.3

Reference: Male: 0.8 - 1.3

07 Nov 2025 **1.05** | 30 Nov 2024 **0.86** | 02 Jul 2023 **0.87**

Urea

Normal

Protein waste marker used in routine kidney function assessment.

LATEST
16 mg/dL

LAST UPDATED
07 Jan 2017

16

Low 15 | Target range | High 39

Reference: 15 - 39

Uric Acid

Normal

Purine metabolism marker; high values may relate to gout/metabolic risk.

LATEST	TREND	LAST UPDATED
5.27 mg/dL		**20 Dec 2025**

5.27

Low 3.6 | Target range | High 8.2

Reference: Male: 3.6 - 8.2

07 Nov 2025 **6.3** | 30 Nov 2024 **4.8** | 02 Jul 2023 **4.8**

Liver

GOT (AST)

High

Liver enzyme; elevation may indicate liver or muscle stress.

LATEST	TREND	LAST UPDATED
102 U/L		**07 Nov 2025**

102

Low 0 | Lower is better | High 35

Reference: Male: Up to 35

30 Nov 2024 **22** | 07 Sept 2024 **17** | 02 Jul 2023 **18**

GPT (ALT)

High

Liver enzyme commonly used to track hepatocellular injury.

LATEST	TREND	LAST UPDATED
71 U/L		**07 Nov 2025**

71

Low 0 | Target range | High 45

Reference: Male: Up to 45

30 Nov 2024 **37** | 07 Sept 2024 **32** | 02 Jul 2023 **27**

Bilirubin Total

Low

Pigment metabolism marker used in liver and hemolysis evaluation.

LATEST	TREND	LAST UPDATED
0.24 mg/dL		**02 Jul 2023**

0.24

Low 0.3 | Lower is better | High 1.2

Reference: 0.3 - 1.2

03 Aug 2022 **0.32** | 29 Sept 2020 **0.54** | 13 Mar 2018 **0.48**

GGTP (gamma-GT)

Normal

Liver/biliary enzyme often used in alcohol and cholestatic assessment.

LATEST	TREND	LAST UPDATED
23 U/L		**07 Nov 2025**

23

Low 11 | Lower is better | High 61

Reference: Male : 11 - 61

30 Nov 2024 **36** | 02 Jul 2023 **27** | 12 Nov 2022 **19**

Vitamins & Minerals

Vitamin B12

Normal

Vitamin B12 level important for blood and nerve function.

LATEST	TREND	LAST UPDATED
454 pg/mL		**07 Nov 2025**

454

Low 192 | Higher is better | High 827

Reference: Deficient : 32 - 191
Normal : 192 - 827

30 Nov 2024 **219** | 02 Jul 2023 **289** | 01 Jun 2022 **263**

25-OH Vitamin D (Calcidiol)

Normal

Vitamin D status marker important for bone and immune health.

LATEST	TREND	LAST UPDATED
43.7 ng/mL		**30 Nov 2024**

43.7

Low 30 | Higher is better | High 100

Reference: Deficiency : less than 20
Insufficiency : 20 - 30
Sufficiency : 30 - 100
Recommended : 50 - 100
Toxicity : > 100

02 Jul 2023 **44** | 01 Jun 2022 **72.9** | 05 Dec 2021 **33.3**

Iron

Normal

Laboratory marker tracked over time for preventive trend-based health review.

LATEST
89 µg/dL

TREND

LAST UPDATED
07 Nov 2025

89

Low 45 | Target range | High 158

Reference: Male: 45 - 158

01 May 2025 **61** | 01 Jun 2022 **108** | 26 Feb 2019 **146**

Ferritin

Normal

Laboratory marker tracked over time for preventive trend-based health review.

LATEST
78.9 ng/mL

TREND

LAST UPDATED
20 Dec 2025

78.9

Low 24 | Target range | High 475

Reference: Males : 24 - 425

01 May 2025 **68.5** | 01 Jun 2022 **43.91** | 26 Feb 2019 **55.3**

Magnesium

Normal

Essential mineral involved in muscle, nerve, and metabolic function.

LATEST
1.8 mg/dL

LAST UPDATED
20 Dec 2025

1.8

Low 1.77 | Target range | High 2.5

Reference: 1.77 - 2.5

Hormonal Health

Thyroid Stimulating Hormone (TSH)

Normal

Primary thyroid-control hormone used for thyroid screening.

LATEST
3.5 µIU/mL

TREND

LAST UPDATED
07 Nov 2025

3.5

Low 0.35 | Target range | High 4.94

Reference: Adult: 0.3 - 4.5

02 Jul 2023 **3.03** | 08 Apr 2017 **0.95** | 07 Jan 2017 **2.51**

Testosterone

Normal

Major androgen hormone involved in reproductive and metabolic health.

LATEST
334 ng/dL

TREND

LAST UPDATED
20 Dec 2025

334

Low 171 | Target range | High 789

Reference: 171 - 789

30 Nov 2024 **396**

Stress

Cortisol (8 AM)

Normal

Stress hormone marker that follows a daily biological rhythm.

LATEST
13 µg/dL

TREND

LAST UPDATED
20 Dec 2025

13

Low 4.5 | Target range | High 20.8

Reference: 6 - 10 AM : 4.5 - 20.8

02 Jul 2023 **15.55**

Cancer Screen

Total Prostatic Specific Antigen (PSA)

Normal

Prostate-related screening marker used with clinical correlation.

LATEST	LAST UPDATED
0.44 ng/mL	**30 Nov 2024**

0.44

Low 0 | Target range | High 4

Reference: Up to 4

Inflammation

C Reactive Proteins (CRP)

High

Inflammation marker often used for infection/inflammatory activity tracking.

LATEST	TREND	LAST UPDATED
40.9 mg/L		**07 Sept 2024**

40.9

Low 0 | Lower is better | High 3

Reference: Less than 3

16 Jan 2023 **40.9** | 22 Apr 2019 **5.75** | 13 Mar 2018 **4.2**

General Health

IgE

High

Allergy-associated antibody marker that may rise in atopic states.

LATEST	TREND	LAST UPDATED
230.5 IU/mL		**22 Apr 2019**

230.5

Low 0 | Target range | High 158

Reference: Adults: 0 - 158

28 Apr 2015 **127.1**

Glucose Random

Low

Blood sugar level at the time of sample collection.

LATEST	TREND	LAST UPDATED
66 mg/dL		**07 Nov 2025**

66

Low 70 | Target range | High 140

Reference: 70 - 140

04 Dec 2021 **87** | 03 Apr 2015 **81** | 13 Jun 2014 **95**

Haemoglobin

Normal

Oxygen-carrying protein in red blood cells.

LATEST	TREND	LAST UPDATED
13.7 gm/dL		**07 Nov 2025**

13.7

Low 13 | Target range | High 17

Reference: Male : 13.0 - 17.0

01 May 2025 **14.6** | 30 Nov 2024 **14.9** | 07 Sept 2024 **13.5**

WBC Count

Normal

White blood cell count indicating immune/infection activity.

LATEST	TREND	LAST UPDATED
8.02 10^3/µL		**07 Nov 2025**

8.02

Low 4 | Target range | High 10

Reference: 4.0 - 10.0

01 May 2025 **6.59** | 30 Nov 2024 **6.52** | 07 Sept 2024 **13.06**

Platelet Count

Normal

Clotting cell count important for bleeding and thrombotic risk.

LATEST	TREND	LAST UPDATED
221 10^3/µL		**07 Nov 2025**

221

Low 150 | Target range | High 410

Reference: Adult: 150 - 410

01 May 2025 **198** | 30 Nov 2024 **231** | 07 Sept 2024 **191**

E.S.R. - I Hr.

Normal

Laboratory marker tracked over time for preventive trend-based health review.

LATEST	TREND	LAST UPDATED
10 mm I Hr		**02 Jul 2023**

10

Low 0 | Target range | High 10

Reference: Male (18-50 Y): <= 10

05 Aug 2019 **4** | 22 Apr 2019 **8** | 26 Feb 2019 **4**

Thyroxine (T4)

Normal

Laboratory marker tracked over time for preventive trend-based health review.

LATEST	LAST UPDATED
7.14 ug/dL	**02 Jul 2023**

7.14

Low 4.87 | Target range | High 11.72

Reference: Adult: 4.87 - 11.72
