Trend Highlights

High Risk

Cardiac Risk Evaluation

2 high

Total Cholesterol	205 mg/dL 20 Dec 25
LDL Cholesterol	129.6 mg/dL 20 Dec 25

High Risk

Liver Risk Evaluation

2 high

GOT (AST)	102 U/L 07 Nov 25
GPT (ALT)	71 U/L 07 Nov 25

Watch

Diabetes Risk Evaluation

1 low

Glucose Random	66 mg/dL 07 Nov 25

Watch

Inflammation Risk Evaluation

1 high

C Reactive Proteins (CRP)	40.9 mg/L 07 Sept 24

On Track

Hormonal & Stress Risk Evaluation

1 priority marker

Cortisol (8 AM) PRIORITY MARKER: ON TRACK	13 µg/dL 20 Dec 25

Apr 2026

Follow-up Window

Recommended tests to re-check in your follow-up cycle.

Lipid Profile, Diabetes Panel, Liver Function Tests (LFT), CRP

Summary by Type

Cardiac

Unfavourable	2
High	2
Low	0
Normal	3
Priority	1

Total Cholesterol • LDL Cholesterol • Triglycerides • HDL Cholesterol

Liver

Unfavourable	2
High	2
Low	1
Normal	1
Priority	0

GOT (AST) • GPT (ALT) • Bilirubin Total • GGTP (gamma-GT)

Diet

Unfavourable	1
High	1
Low	1
Normal	9
Priority	0

Glucose Random • Fasting Glucose • Glycosylated Haemoglobin • Creatinine

Vitamins & Minerals

Unfavourable	0
High	0
Low	0
Normal	5
Priority	0

Vitamin B12 • 25-OH Vitamin D (Calcidiol) • Iron • Ferritin

Cardiac (Lipid)

Total Cholesterol

High

Total cholesterol in blood; useful for overall lipid risk evaluation.

LATEST **205 mg/dL** | TREND | LAST UPDATED **20 Dec 2025**

205

Low 1 — Lower is better — High 200

Reference: *Desirable Level: Less than 200
Borderline : 200 - 240
Undesirable : Above 240

30 Nov 2024 **209** | 02 Jul 2023 **194** | 12 Nov 2022 **185**

LDL Cholesterol

High

Low-density lipoprotein; higher levels can increase cardiovascular risk.

LATEST **129.6 mg/dL** | TREND | LAST UPDATED **20 Dec 2025**

129.6

Low 0 — Lower is better — High 129

Reference: * Optimal : Less than 100
Near Optimal : 100 - 129
Borderline High : 130 - 159
High : 160 - 189
Very High : Above 190

30 Nov 2024 **139.6** | 02 Jul 2023 **82.6** | 12 Nov 2022 **122.2**

Triglycerides

Normal

Blood fat linked with metabolic and cardiovascular risk when elevated.

LATEST **132 mg/dL** | TREND | LAST UPDATED **20 Dec 2025**

132

Low 0 — Lower is better — High 150

Reference: *Desirable Level : < 150
Borderline High : 150 - 199
High : 200 - 499
Very High : > 500

30 Nov 2024 **87** | 02 Jul 2023 **377** | 12 Nov 2022 **49**

HDL Cholesterol

Normal

High-density lipoprotein; generally protective for heart health.

LATEST **49 mg/dL** | TREND | LAST UPDATED **20 Dec 2025**

49

Low 40 — Higher is better — High 120

Reference: * Desirable Level : More than 60
Optimal : 40 - 59
Undesirable : Below 40

30 Nov 2024 **52** | 02 Jul 2023 **36** | 12 Nov 2022 **53**

Homocysteine

Normal

Amino acid marker linked with vascular and nutritional risk profiling.

LATEST	LAST UPDATED
10.98 µmol/L	**26 Feb 2019**

10.98

Low 5.46 | Target range | High 16.2

Reference: Male: 5.46 - 16.20

Diabetes

Glucose Random

Low

Blood sugar level at the time of sample collection.

LATEST	TREND	LAST UPDATED
66 mg/dL		**07 Nov 2025**

66

Low 70 | Target range | High 140

Reference: 70 - 140

04 Dec 2021 **87** | 03 Apr 2015 **81** | 13 Jun 2014 **95**

Fasting Glucose

Normal

Fasting blood sugar level after an overnight fast.

LATEST	TREND	LAST UPDATED
97 mg/dL		**20 Dec 2025**

97

Low 70 | Lower is better | High 100

Reference: 70 - 100
Impaired Fasting: 100 - 125

30 Nov 2024 **103** | 02 Jul 2023 **105** | 12 Nov 2022 **90**

Glycosylated Haemoglobin

Normal

Average blood sugar control over the last ~3 months.

LATEST	TREND	LAST UPDATED
5.5 %		**07 Nov 2025**

5.5

Low 4 | Lower is better | High 5.7

Reference: Up to 5.6 % : Normal
5.7 - 6.4 % : Increased risk for Diabetes
> 6.5 % : Diabetic Range
> 7.0 % : Indicative of poor glycaemic control
> 9.0 % : Suggestive of uncontrolled diabetes

30 Nov 2024 **5** | 02 Jul 2023 **5.6** | 30 Nov 2022 **5.4**

Kidney

Creatinine

Normal

Kidney filtration marker; helps assess renal function.

LATEST	TREND	LAST UPDATED
1.01 mg/dL		**20 Dec 2025**

1.01

Low 0.8 | Lower is better | High 1.3

Reference: Male: 0.8 - 1.3

07 Nov 2025 **1.05** | 30 Nov 2024 **0.86** | 02 Jul 2023 **0.87**

Urea

Normal

Protein waste marker used in routine kidney function assessment.

LATEST	LAST UPDATED
16 mg/dL	**07 Jan 2017**

16

Low 15 | Target range | High 39

Reference: 15 - 39

Uric Acid

Normal

Purine metabolism marker; high values may relate to gout/metabolic risk.

LATEST	TREND	LAST UPDATED
5.27 mg/dL		**20 Dec 2025**

5.27

Low 3.6 | Target range | High 8.2

Reference: Male: 3.6 - 8.2

07 Nov 2025 **6.3** | 30 Nov 2024 **4.8** | 02 Jul 2023 **4.8**

Liver

GOT (AST)

High

Liver enzyme; elevation may indicate liver or muscle stress.

LATEST	TREND	LAST UPDATED
102 U/L		**07 Nov 2025**

102

Low 0 | Lower is better | High 35

Reference: Male: Up to 35

30 Nov 2024 **22** | 07 Sept 2024 **17** | 02 Jul 2023 **18**

GPT (ALT)

High

Liver enzyme commonly used to track hepatocellular injury.

LATEST	TREND	LAST UPDATED
71 U/L		**07 Nov 2025**

71

Low 0 | Target range | High 45

Reference: Male: Up to 45

30 Nov 2024 **37** | 07 Sept 2024 **32** | 02 Jul 2023 **27**

Bilirubin Total

Low

Pigment metabolism marker used in liver and hemolysis evaluation.

LATEST	TREND	LAST UPDATED
0.24 mg/dL		**02 Jul 2023**

0.24

Low 0.3 | Lower is better | High 1.2

Reference: 0.3 - 1.2

03 Aug 2022 **0.32** | 29 Sept 2020 **0.54** | 13 Mar 2018 **0.48**

GGTP (gamma-GT)

Normal

Liver/biliary enzyme often used in alcohol and cholestatic assessment.

LATEST	TREND	LAST UPDATED
23 U/L		**07 Nov 2025**

23

Low 11 | Lower is better | High 61

Reference: Male : 11 - 61

30 Nov 2024 **36** | 02 Jul 2023 **27** | 12 Nov 2022 **19**

Vitamins & Minerals

Vitamin B12

Normal

Vitamin B12 level important for blood and nerve function.

LATEST	TREND	LAST UPDATED
454 pg/mL		**07 Nov 2025**

454

Low 192 | Higher is better | High 827

Reference: Deficient : 32 - 191
Normal : 192 - 827

30 Nov 2024 **219** | 02 Jul 2023 **289** | 01 Jun 2022 **263**

25-OH Vitamin D (Calcidiol)

Normal

Vitamin D status marker important for bone and immune health.

LATEST	TREND	LAST UPDATED
43.7 ng/mL		**30 Nov 2024**

43.7

Low 30 | Higher is better | High 100

Reference: Deficiency : less than 20
Insufficiency : 20 - 30
Sufficiency : 30 - 100
Recommended : 50 - 100
Toxicity : > 100

02 Jul 2023 **44** | 01 Jun 2022 **72.9** | 05 Dec 2021 **33.3**

Iron

Normal

Laboratory marker tracked over time for preventive trend-based health review.

LATEST
89 µg/dL

TREND

LAST UPDATED
07 Nov 2025

89

Low 45 | Target range | High 158

Reference: Male: 45 - 158

01 May 2025 **61** | 01 Jun 2022 **108** | 26 Feb 2019 **146**

Ferritin

Normal

Laboratory marker tracked over time for preventive trend-based health review.

LATEST
78.9 ng/mL

TREND

LAST UPDATED
20 Dec 2025

78.9

Low 24 | Target range | High 475

Reference: Males : 24 - 425

01 May 2025 **68.5** | 01 Jun 2022 **43.91** | 26 Feb 2019 **55.3**

Magnesium

Normal

Essential mineral involved in muscle, nerve, and metabolic function.

LATEST
1.8 mg/dL

LAST UPDATED
20 Dec 2025

1.8

Low 1.77 | Target range | High 2.5

Reference: 1.77 - 2.5

Hormonal Health

Thyroid Stimulating Hormone (TSH)

Normal

Primary thyroid-control hormone used for thyroid screening.

LATEST
3.5 µIU/mL

TREND

LAST UPDATED
07 Nov 2025

3.5

Low 0.35 | Target range | High 4.94

Reference: Adult: 0.3 - 4.5

02 Jul 2023 **3.03** | 08 Apr 2017 **0.95** | 07 Jan 2017 **2.51**

Thyroxine (T4)

Normal

Laboratory marker tracked over time for preventive trend-based health review.

LATEST
7.14 ug/dL

LAST UPDATED
02 Jul 2023

7.14

Low 4.87 | Target range | High 11.72

Reference: Adult: 4.87 - 11.72

Testosterone

Normal

Major androgen hormone involved in reproductive and metabolic health.

LATEST
334 ng/dL

TREND

LAST UPDATED
20 Dec 2025

334

Low 171 | Target range | High 789

Reference: 171 - 789

30 Nov 2024 **396**

Stress

Cortisol (8 AM)

Normal

Stress hormone marker that follows a daily biological rhythm.

LATEST	TREND	LAST UPDATED
13 µg/dL		**20 Dec 2025**

13

Low 4.5 | Target range | High 20.8

Reference: 6 - 10 AM : 4.5 - 20.8

02 Jul 2023 **15.55**

Cancer Screen

Total Prostatic Specific Antigen (PSA)

Normal

Prostate-related screening marker used with clinical correlation.

LATEST	LAST UPDATED
0.44 ng/mL	**30 Nov 2024**

0.44

Low 0 | Target range | High 4

Reference: Up to 4

Inflammation

C Reactive Proteins (CRP)

High

Inflammation marker often used for infection/inflammatory activity tracking.

LATEST	TREND	LAST UPDATED
40.9 mg/L		**07 Sept 2024**

40.9

Low 0 | Lower is better | High 3

Reference: Less than 3

16 Jan 2023 **40.9** | 22 Apr 2019 **5.75** | 13 Mar 2018 **4.2**

General Health

IgE

High

Allergy-associated antibody marker that may rise in atopic states.

LATEST	TREND	LAST UPDATED
230.5 IU/mL		**22 Apr 2019**

230.5

Low 0 | Target range | High 158

Reference: Adults: 0 - 158

28 Apr 2015 **127.1**

Haemoglobin

Normal

Oxygen-carrying protein in red blood cells.

LATEST	TREND	LAST UPDATED
13.7 gm/dL		**07 Nov 2025**

13.7

Low 13 | Target range | High 17

Reference: Male : 13.0 - 17.0

01 May 2025 **14.6** | 30 Nov 2024 **14.9** | 07 Sept 2024 **13.5**

WBC Count

Normal

White blood cell count indicating immune/infection activity.

LATEST	TREND	LAST UPDATED
8.02 10^3/µL		**07 Nov 2025**

8.02

Low 4 | Target range | High 10

Reference: 4.0 - 10.0

01 May 2025 **6.59** | 30 Nov 2024 **6.52** | 07 Sept 2024 **13.06**

Platelet Count

Normal

Clotting cell count important for bleeding and thrombotic risk.

LATEST	TREND	LAST UPDATED
221 10^3/µL		**07 Nov 2025**

221

Low 150 | Target range | High 410

Reference: Adult: 150 - 410

01 May 2025 **198** | 30 Nov 2024 **231** | 07 Sept 2024 **191**

E.S.R. - I Hr.

Normal

Laboratory marker tracked over time for preventive trend-based health review.

LATEST	TREND	LAST UPDATED
10 mm I Hr		**02 Jul 2023**

10

Low 0 | Target range | High 10

Reference: Male (18-50 Y): <= 10

05 Aug 2019 **4** | 22 Apr 2019 **8** | 26 Feb 2019 **4**

Recommendations & Next Steps

Follow-up Window: Apr 2026

- Cardiac Risk Evaluation: 2 high
- Liver Risk Evaluation: 2 high
- Diabetes Risk Evaluation: 1 low
- Inflammation Risk Evaluation: 1 high
- Hormonal & Stress Risk Evaluation: 1 priority marker
- Recommended repeat panel(s): Lipid Profile, Diabetes Panel, Liver Function Tests (LFT), CRP

This Trend Report is for statistical trend awareness and preventive planning only, not diagnosis. Always consult your clinician before changing medication, supplements, or treatment.
