Smart Trend Report

VIJAY CHIMANDAS JHAMNANI · 71 · Male

Risk Level: **LOW**

FIRST REGISTERED	LAST TEST
13 Oct 2025	**26 Mar 2026**
DAYS SINCE LAST TEST	FOLLOW-UP WINDOW
4	**Jun 2026**

Actionable Summary

High Risk

Vitamins & Minerals Risk Evaluation

2 high

Vitamin B12	**1554 pg/mL** 20 Mar 26
Folate	**11.9 ng/mL** 13 Feb 26

Watch

Diabetes Risk Evaluation

1 high · 1 priority marker

Glycosylated Haemoglobin	**6 %** 20 Mar 26
HOMA - IR Index **PRIORITY MARKER: ON TRACK**	**1.9** 31 Jan 26

Watch

General Health Risk Evaluation

1 high

IgE	**141 IU/mL** 26 Dec 25

On Track

Cardiac Risk Evaluation

3 priority marker

Homocysteine **PRIORITY MARKER: ON TRACK**	**6.74 µmol/L** 13 Feb 26
Apolipoprotein - A1 **PRIORITY MARKER: ON TRACK**	**156 mg/dL** 13 Feb 26
Apolipoprotein - B **PRIORITY MARKER: ON TRACK**	**85 mg/dL** 13 Feb 26

On Track

Hormonal & Stress Risk Evaluation

2 priority marker

Cortisol (6 - 10 AM) **PRIORITY MARKER: ON TRACK**	**9.23 µg/dL** 13 Feb 26
Cortisol (4 - 8 PM) **PRIORITY MARKER: ON TRACK**	**3.63 µg/dL** 24 Dec 25

Jun 2026

Follow-up Window

Recommended tests to re-check in your follow-up cycle.

Lipid Profile, Diabetes Panel, Vitamin & Mineral Panel, Thyroid & Hormonal Panel

Triggered Rule Insights

No major rules triggered by current configuration.

Summary by Type

Cardiac

Unfavourable	0
High	0
Low	0
Normal	9
Priority	3

Total Cholesterol • Triglycerides • HDL Cholesterol • LDL Cholesterol

Liver

Unfavourable	0
High	0
Low	0
Normal	4
Priority	0

Bilirubin Total • AST (GOT) • ALT (GPT) • GGTP (gamma-GT)

Diet

Unfavourable	0
High	2
Low	0
Normal	11
Priority	1

Glycosylated Haemoglobin • Glucose Random • Fasting Glucose • Fasting Insulin

Vitamins & Minerals

Unfavourable	0
High	2
Low	0
Normal	3
Priority	0

Vitamin B12 • Folate • Vitamin D 25-OH (Calcidiol) • Ferritin

Cardiac (Lipid)

Total Cholesterol

Normal

Total cholesterol in blood; useful for overall lipid risk evaluation.

LATEST **180 mg/dL** | TREND | LAST UPDATED **26 Mar 2026**

180

Low 1 — Lower is better — High 200

Reference: *Desirable Level: Less than 200
Borderline : 200 - 240
Undesirable : Above 240

20 Mar 2026 **175** | 13 Feb 2026 **173** | 31 Jan 2026 **217**

Triglycerides

Normal

Blood fat linked with metabolic and cardiovascular risk when elevated.

LATEST **74 mg/dL** | TREND | LAST UPDATED **26 Mar 2026**

74

Low 0 — Lower is better — High 150

Reference: *Desirable Level : < 150
Borderline High : 150 - 199
High : 200 - 499
Very High : > 500

20 Mar 2026 **50** | 13 Feb 2026 **63** | 31 Jan 2026 **55**

HDL Cholesterol

Normal

High-density lipoprotein; generally protective for heart health.

LATEST **54 mg/dL** | TREND | LAST UPDATED **26 Mar 2026**

54

Low 40 — Higher is better — High 120

Reference: * Desirable Level : More than 60
Optimal : 40 - 59
Undesirable : Below 40

20 Mar 2026 **68** | 13 Feb 2026 **65** | 31 Jan 2026 **69**

LDL Cholesterol

Normal

Low-density lipoprotein; higher levels can increase cardiovascular risk.

LATEST **111.2 mg/dL** | TREND | LAST UPDATED **26 Mar 2026**

111.2

Low 0 — Lower is better — High 129

Reference: * Optimal : Less than 100
Near Optimal : 100 - 129
Borderline High : 130 - 159
High : 160 - 189
Very High : Above 190

20 Mar 2026 **97** | 13 Feb 2026 **95.4** | 24 Dec 2025 **109**

Homocysteine

Normal

Amino acid marker linked with vascular and nutritional risk profiling.

LATEST
6.74 µmol/L

TREND

LAST UPDATED
13 Feb 2026

6.74

Low 5.46 | Target range | High 16.2

Reference: Male: 5.46 - 16.20

24 Dec 2025 **8.55** | 18 Oct 2025 **6.81**

N - Terminal Pro B - Type Natriuretic Peptide

Normal

Cardiac stress marker often used in heart failure risk evaluation.

LATEST
18.4 pg/mL

LAST UPDATED
24 Dec 2025

18.4

Low 0 | Lower is better | High 125

Reference: Less than 125

Apolipoprotein - A1

Normal

Advanced lipid particle marker used for cardiovascular risk stratification.

LATEST
156 mg/dL

TREND

LAST UPDATED
13 Feb 2026

156

Low 105 | Higher is better | High 175

Reference: 105 - 175

31 Jan 2026 **170** | 22 Nov 2025 **168** | 18 Oct 2025 **152**

Apolipoprotein - B

Normal

Advanced lipid particle marker used for cardiovascular risk stratification.

LATEST
85 mg/dL

TREND

LAST UPDATED
13 Feb 2026

85

Low 60 | Lower is better | High 140

Reference: Male: 60 - 140

31 Jan 2026 **94** | 22 Nov 2025 **97** | 18 Oct 2025 **82**

High sensitive Troponin I

Normal

Laboratory marker tracked over time for preventive trend-based health review.

LATEST
3.9 pg/mL

LAST UPDATED
26 Mar 2026

3.9

Low 0 | Target range | High 6

Reference: Male : Risk
Low : < 6
Moderate : 6 - 12
Elevated : > 12

Diabetes

Glycosylated Haemoglobin

High

Average blood sugar control over the last ~3 months.

LATEST
6 %

TREND

LAST UPDATED
20 Mar 2026

6

Low 4 | Lower is better | High 5.6

Reference: Up to 5.6 % : Normal
5.7 - 6.4 % : Increased risk for Diabetes
> 6.5 % : Diabetic Range
> 7.0 % : Indicative of poor glycaemic control
> 9.0 % : Suggestive of uncontrolled diabetes

01 Feb 2026 **6** | 22 Nov 2025 **6** | 18 Oct 2025 **5.9**

Glucose Random

Normal

Blood sugar level at the time of sample collection.

LATEST
110 mg/dL

TREND

LAST UPDATED
20 Mar 2026

110

Low 70 | Lower is better | High 140

Reference: 70 - 140

24 Dec 2025 **92** | 13 Oct 2025 **96**

Fasting Glucose

Normal

Fasting blood sugar level after an overnight fast.

LATEST
99 mg/dL

TREND

LAST UPDATED
26 Mar 2026

99

Low 70 | Lower is better | High 100

Reference: 70 - 100
Impaired Fasting: 100 - 125

13 Feb 2026 **113** | 31 Jan 2026 **93** | 22 Nov 2025 **92**

Fasting Insulin

Normal

Hormone marker that helps assess insulin response and metabolic risk.

LATEST
8.39 IU/mL

LAST UPDATED
31 Jan 2026

8.39

Low 3 | Target range | High 25

Reference: Fasting Insulin : 3 - 25

HOMA - IR Index

Normal

Calculated insulin resistance index derived from fasting glucose and insulin.

LATEST
1.9

LAST UPDATED
31 Jan 2026

1.9

Low 0 | Lower is better | High 1.9

Reference: Healthy Range : 0.5 - 1.4
Less than 1 : Insulin sensitive (optimal)
More than 1.9 : Early insulin resistance
More than 2.9 : Significant insulin resistance

Kidney

Creatinine

Normal

Kidney filtration marker; helps assess renal function.

LATEST
0.81 mg/dL

TREND

LAST UPDATED
20 Mar 2026

0.81

Low 0.8 | Lower is better | High 1.3

Reference: Male: 0.8 - 1.3

13 Feb 2026 **0.73** | 31 Jan 2026 **0.77** | 24 Dec 2025 **0.78**

Urea

Normal

Protein waste marker used in routine kidney function assessment.

LATEST
27 mg/dL

TREND

LAST UPDATED
20 Mar 2026

27

Low 14 | Target range | High 40

Reference: 14 - 40

13 Feb 2026 **22**

Urea Nitrogen (BUN)

Normal

Protein waste marker used in routine kidney function assessment.

LATEST
12.6 mg/dL

TREND

LAST UPDATED
20 Mar 2026

12.6

Low 7 | Target range | High 18

Reference: 7 - 18

13 Feb 2026 **10.3**

Uric Acid

Normal

Purine metabolism marker; high values may relate to gout/metabolic risk.

LATEST
3.6 mg/dL

TREND

LAST UPDATED
20 Mar 2026

3.6

Low 3.6 | Target range | High 8.2

Reference: Male: 3.6 - 8.2

13 Feb 2026 **3**

Liver

Bilirubin Total

Normal

Pigment metabolism marker used in liver and hemolysis evaluation.

LATEST	TREND	LAST UPDATED
0.61 mg/dL		13 Feb 2026

0.61

Low 0.3 — Lower is better — High 1.2

Reference: 0.3 - 1.2

18 Oct 2025 **0.61**

AST (GOT)

Normal

Liver enzyme; elevation may indicate liver or muscle stress.

LATEST	TREND	LAST UPDATED
26 U/L		20 Mar 2026

26

Low 0 — Lower is better — High 35

Reference: Male: Up to 35

13 Feb 2026 **20** | 18 Oct 2025 **17**

ALT (GPT)

Normal

Liver enzyme commonly used to track hepatocellular injury.

LATEST	TREND	LAST UPDATED
27 U/L		20 Mar 2026

27

Low 0 — Lower is better — High 45

Reference: Male: Up to 45

13 Feb 2026 **23** | 18 Oct 2025 **21**

GGTP (gamma-GT)

Normal

Liver/biliary enzyme often used in alcohol and cholestatic assessment.

LATEST	TREND	LAST UPDATED
34 U/L		13 Feb 2026

34

Low 11 — Lower is better — High 61

Reference: Male : 11 - 61

18 Oct 2025 **34**

Vitamins & Minerals

Vitamin B12

High

Vitamin B12 level important for blood and nerve function.

LATEST	TREND	LAST UPDATED
1554 pg/mL		20 Mar 2026

1554

Low 192 — Higher is better — High 827

Reference: Deficient : 32 - 191
Normal : 192 - 827

13 Feb 2026 **1055**

Folate

High

Folate status marker relevant for red cell production and metabolic health.

LATEST	LAST UPDATED
11.9 ng/mL	13 Feb 2026

11.9

Low 3.21 — Higher is better — High 5.21

Reference: Deficient : < 3.21
Inderterminate : 3.21 - 5.21
Normal : > 5.21

Vitamin D 25-OH (Calcidiol)

Normal

Vitamin D status marker important for bone and immune health.

LATEST	TREND	LAST UPDATED
78.6 ng/mL		20 Mar 2026

78.6

Low 30 — Higher is better — High 100

Reference: Deficiency : less than 20
Insufficiency : 20 - 30
Sufficiency : 30 - 100
Recommended : 50 - 100
Toxicity : > 100

13 Feb 2026 **61.8** | 31 Jan 2026 **69.9** | 18 Oct 2025 **93.3**

Ferritin

Normal

Laboratory marker tracked over time for preventive trend-based health review.

LATEST	LAST UPDATED
91 ng/mL	13 Feb 2026

91

Low 24 — Target range — High 475

Reference: Males : 24 - 425

Magnesium

Normal

Essential mineral involved in muscle, nerve, and metabolic function.

LATEST
2.1 mg/dL

TREND

LAST UPDATED
20 Mar 2026

2.1

Low 1.77 | Target range | High 2.5

Reference: 1.77 - 2.5

13 Feb 2026 **1.7** | 24 Dec 2025 **1.8**

Hormonal Health

Thyroid Stimulating Hormone (TSH)

Normal

Primary thyroid-control hormone used for thyroid screening.

LATEST
1.45 µIU/mL

TREND

LAST UPDATED
20 Mar 2026

1.45

Low 0.3 | Target range | High 4.5

Reference: 0.3 - 4.5

31 Jan 2026 **2.06** | 24 Dec 2025 **1.87**

Testosterone

Normal

Major androgen hormone involved in reproductive and metabolic health.

LATEST
537 ng/dL

LAST UPDATED
13 Feb 2026

537

Low 171 | Target range | High 789

Reference: 171 - 789

Stress

Cortisol (6 - 10 AM)

Normal

Stress hormone marker that follows a daily biological rhythm.

LATEST
9.23 µg/dL

LAST UPDATED
13 Feb 2026

9.23

Low 4.5 | Target range | High 20.8

Reference: 6 - 10 AM : 4.5 - 20.8

Cortisol (4 - 8 PM)

Normal

Stress hormone marker that follows a daily biological rhythm.

LATEST
3.63 µg/dL

LAST UPDATED
24 Dec 2025

3.63

Low 2.52 | Target range | High 12.45

Reference: 4 - 8 PM : 2.52 - 12.45

Cancer Screen

CA 19.9

Normal

Laboratory marker tracked over time for preventive trend-based health review.

LATEST
0.6 U/mL

LAST UPDATED
13 Feb 2026

0.6

Low 0 | Target range | High 37

Reference: < 37

CEA (Carcino Embryonic Antigen)

Normal

Laboratory marker tracked over time for preventive trend-based health review.

LATEST
4.63 ng/mL

LAST UPDATED
13 Feb 2026

4.63

Low 0 | Target range | High 5

Reference: Non-Smokers : 0 - 2.5
Smokers : < 5.0

Total Prostatic Specific Antigen (PSA)

Normal

Prostate-related screening marker used with clinical correlation.

LATEST
1.46 ng/mL

TREND

LAST UPDATED
20 Mar 2026

1.46

Low 0 | Target range | High 4

Reference: Up to 4

13 Feb 2026 **0.92** | 31 Jan 2026 **1** | 22 Nov 2025 **1.14**

Inflammation

E.S.R. - I Hr.

Normal

Laboratory marker tracked over time for preventive trend-based health review.

LATEST
15 mm I Hr

TREND

LAST UPDATED
20 Mar 2026

15

Low 0 | Lower is better | High 30

Reference: Male (Above 70 Y): <= 30

13 Feb 2026 **15** | 24 Dec 2025 **10** | 18 Oct 2025 **5**

C Reactive Proteins (CRP)

Normal

Inflammation marker often used for infection/inflammatory activity tracking.

LATEST
4.1 mg/L

TREND

LAST UPDATED
20 Mar 2026

4.1

Low 0 | Lower is better | High 5

Reference: Less than 5

24 Dec 2025 **1.3** | 13 Oct 2025 **0.1**

High Sensitive CRP (hs CRP)

Normal

Inflammation marker often used for infection/inflammatory activity tracking.

LATEST
0.48 mg/L

TREND

LAST UPDATED
13 Feb 2026

0.48

Low 0 | Target range | High 5

Reference: < 5
For cardiac risk stratification:
<1 mg/L : Low cardiovascular risk
1 - 3 mg/L : Moderate risk
>3 mg/L : High risk
(In the absence of acute infection or chronic inflammatory disease)

22 Nov 2025 **0.54** | 18 Oct 2025 **0.46**

General Health

IgE

High

Allergy-associated antibody marker that may rise in atopic states.

LATEST
141 IU/mL

LAST UPDATED
26 Dec 2025

141

Low 0 | Target range | High 100

Reference: Adults: 0 - 100

Haemoglobin

Normal

Oxygen-carrying protein in red blood cells.

LATEST
14.8 gm/dL

TREND

LAST UPDATED
20 Mar 2026

14.8

Low 13 | Target range | High 17

Reference: Male : 13.0 - 17.0

13 Feb 2026 **14.8** | 31 Jan 2026 **15.6** | 24 Dec 2025 **15.4**

Total Leucocytes (WBC) Count

Normal

White blood cell count indicating immune/infection activity.

LATEST	TREND	LAST UPDATED
5.17 10^3/µL		**20 Mar 2026**

5.17

Low 4 | Target range | High 10

Reference: 4.0 - 10.0

13 Feb 2026 **5.18** | 31 Jan 2026 **4.88** | 24 Dec 2025 **5.19**

Platelet Count

Normal

Clotting cell count important for bleeding and thrombotic risk.

LATEST	TREND	LAST UPDATED
155 10^3/µL		**20 Mar 2026**

155

Low 150 | Target range | High 410

Reference: Adult: 150 - 410

13 Feb 2026 **193** | 31 Jan 2026 **189** | 24 Dec 2025 **179**
